DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 8 and 9, filed 05 January 2006, with respect to independent claims 1 and 9 have been fully considered and are persuasive. The previous rejection of all claims has been withdrawn.

Allowable Subject Matter

2. Claims 1-14 are allowed over the Prior Art of record.

3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claims 1 and 9 is the inclusion of the specific limitation of ***an accumulator containing elastic volume of liquid*** (emphasis added), wherein a ***pressure measuring means*** (emphasis added) makes pressure measurements (i.e. variations) ***in the accumulator thus calculating the volume of liquid injected in the chamber from the accumulator*** (emphasis added), these limitations employed in a device for evaluating physical parameters of fragments and a method of employing such a device. While accumulators are employed in the Prior Art, such as US 6,935,159 to Knight et al., they fail to disclose teach the combination of elements emphasized above, specifically, the "elastic volume of liquid" and the measurement of pressure variations within the accumulator thus providing a measurement of volume of liquid injected and collected within the accumulator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
